Legacy to AI-First: GenAI-Powered Migrations

Five on-prem workloads to Webex. One repeatable pattern. AI at both ends.

Speaker Name
Title, Company

Agenda

01 Why migrate now

02 AI works twice

03 The five-step method

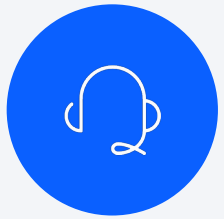

04 Five plays, one pattern

05 Guardrails & takeaways

© 2026 Cisco and/or its affiliates. All rights reserved.

Don't just migrate.
Transform.

The legacy tax

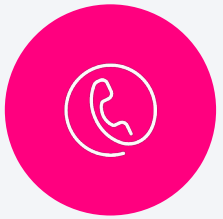

UCCX

Java-serialized AEF scripts

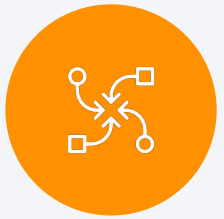

Hunt Pilots

Dead pilots, tangled lists

Unity Connection

Deep touch-tone trees

CUCM Dial Plan

CSS & partition sprawl

CE Endpoints

Aging macros & xAPI

Opaque. Manual. Error-prone.

© 2026 Cisco and/or its affiliates. All rights reserved.

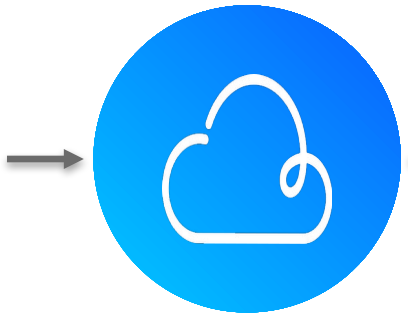

02 · TWO ROLES FOR AI

AI works twice

DURING THE MIGRATION

AI as your copilot

- Parse legacy configs
- Map to cloud objects
- Draft CSV & JSON
- Generate test plans

Webex Cloud

AFTER THE MIGRATION

AI as your product

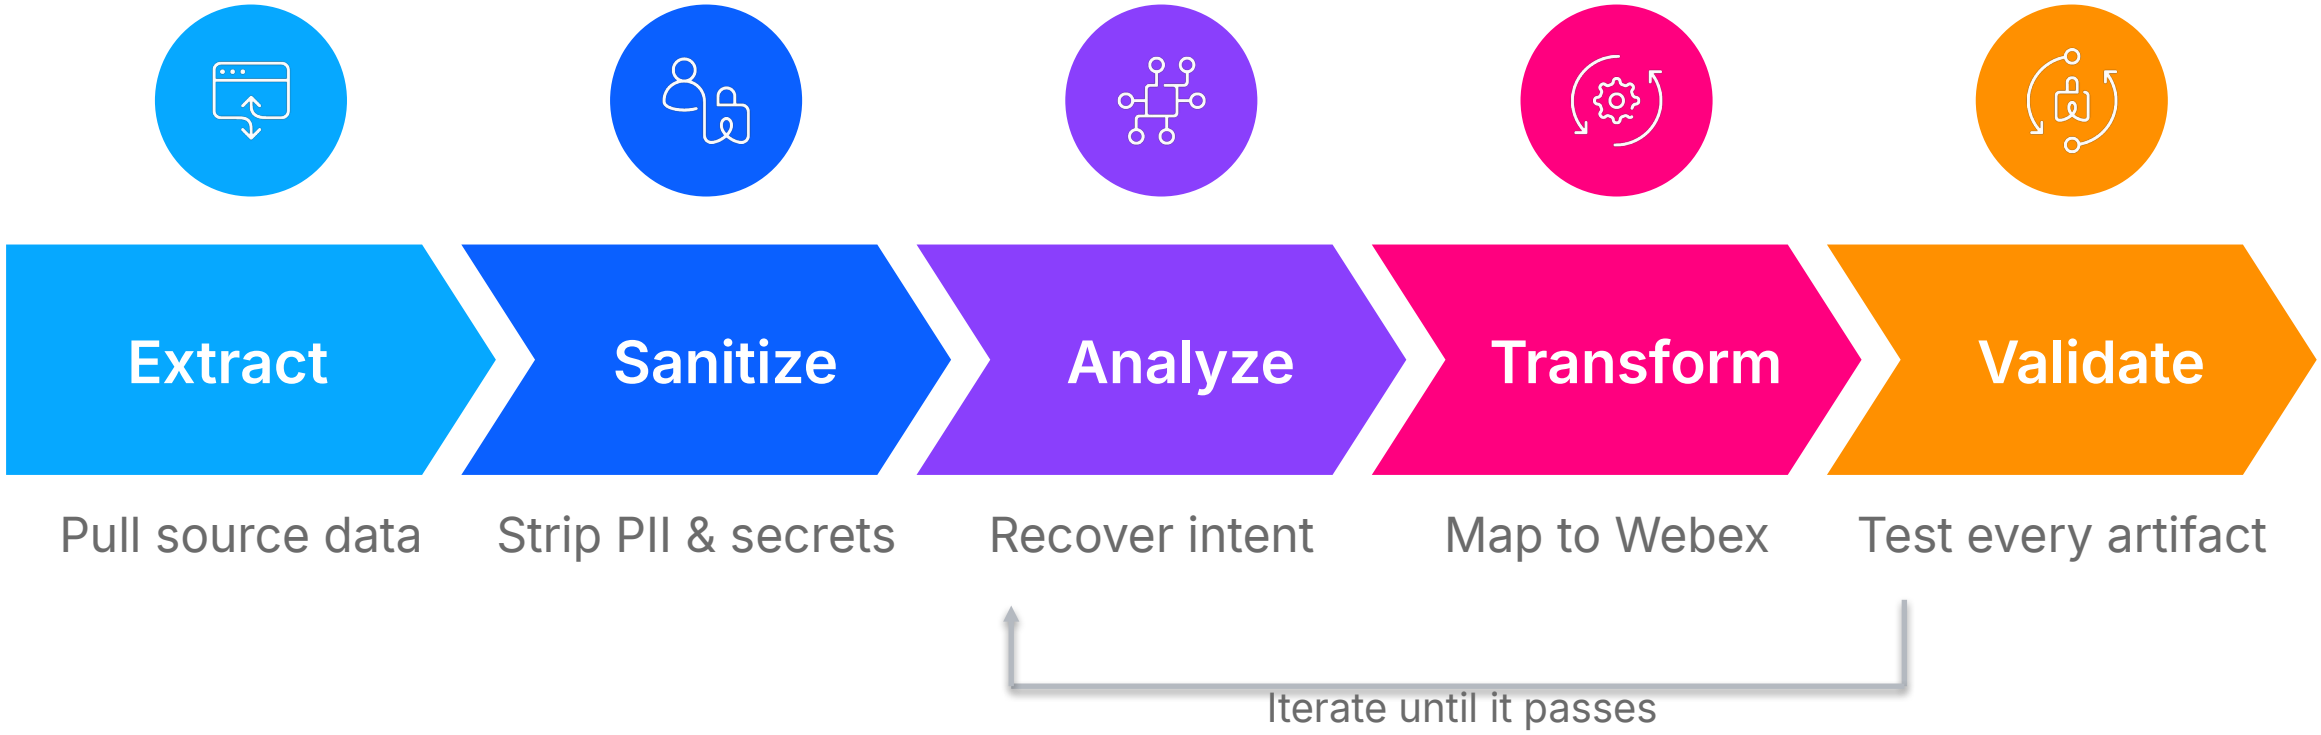

- Webex AI Agent
- AI Receptionist
- Voicemail Transcription
- AI Assistant on RoomOS

© 2026 Cisco and/or its affiliates. All rights reserved.

01
The Method

THE FIVE-STEP METHOD

One method. Every workload.

Human in the loop: AI drafts. Engineers approve.

© 2026 Cisco and/or its affiliates. All rights reserved.

webex

THE MIGRATION MAP

Five workloads. Five AI destinations.

LEGACY	HOW IT MOVES	WEBEX TARGET	AI PAYOFF
UCCX	Auto-extract CSQs & skills	Webex Contact Center	Webex AI Agent
Hunt Pilots	Control Hub bulk provisioning	Customer Assist	AI summaries + sentiment
Unity Connection	CallHandlerDataDump → CSV	Auto Attendants	AI Receptionist
CUCM Dial Plan	Migration wizard + E.164	Webex Calling	Voicemail AI Transcription
CE Endpoints	Webex Device Connector	RoomOS Workspaces	AI Assistant + GenAI macros

© 2026 Cisco and/or its affiliates. All rights reserved.

AI drafts.
Engineers decide.

Your copilot - never the authority.

© 2026 Cisco and/or its affiliates. All rights reserved.

webex

PROMPT ARCHITECTURE

Prompt like an architect

1. **Role**
   Act as a UCCX migration analyst
2. **Source**
   Sanitized export + product version
3. **Constraints**
   Schema, privacy, no invented APIs
4. **Output**
   JSON / CSV + mapping table
5. **Uncertainty**
   Flag REQUIRES_VALIDATION

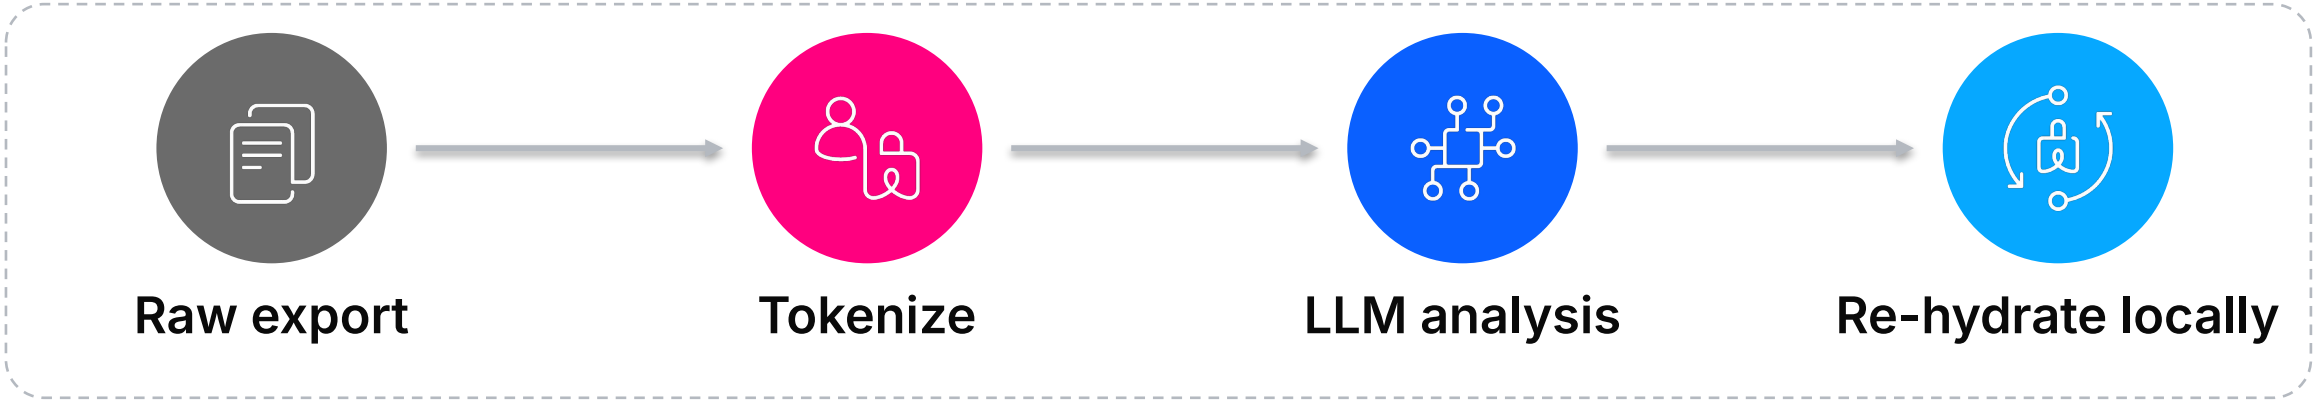

migration_prompt.txt

```
ROLE     UCCX → WxCC migration analyst
SOURCE   sanitized .aef XML, UCCX 12.5
GOAL     Flow Designer-ready JSON
RULES    documented nodes only
         never invent APIs or fields
OUTPUT   flow.json + mapping.csv
FLAG     REQUIRES_VALIDATION if unsure
```

© 2026 Cisco and/or its affiliates. All rights reserved.

DATA GUARDRAILS

Sanitize before you send

Phone	+1 703 555 1212	+1XXXXXXXX01
User	jane.smith@example.com	USER_014
Site	HQ-Route-List	SITE_A_ROUTE_LIST

Key stays local

webex

02
Five Plays

PLAY 1 · UCCX → WEBEX CONTACT CENTER

Decode the AEF. Rebuild in Flow Designer.

WHAT MOVES

CSQs → Queues | Skills | Agents & teams | Prompts | Wrap-up codes | Entry points

No manual rebuilds. Review. Test. Import.

© 2026 Cisco and/or its affiliates. All rights reserved.

webex

PLAY 1 · INTENT MAPPING

Every UCCX step has a new home

UCCX STEP	PURPOSE	WEBEX CONTACT CENTER
Menu	Capture choice	Menu → AI intent
Select Resource	Route to agent	Queue + skill match
Day of Week	Apply schedule	Business-hours check
Get Contact Info	Read attributes	Flow variables
Database step	Fetch data	HTTP request / API
Prompt	Inform caller	TTS or AI response
Exception branch	Handle failure	Error path

© 2026 Cisco and/or its affiliates. All rights reserved.

PLAY 1 · WEBEX AI AGENT

Retire the IVR. Open a front door.

~~"Press 1 for billing. Press 2 for..."~~

"Hi! How can I help today?"

- Autonomous + scripted modes
- Acts in Epic & Salesforce
- Empathetic, multilingual voice
- Hands off with a summary

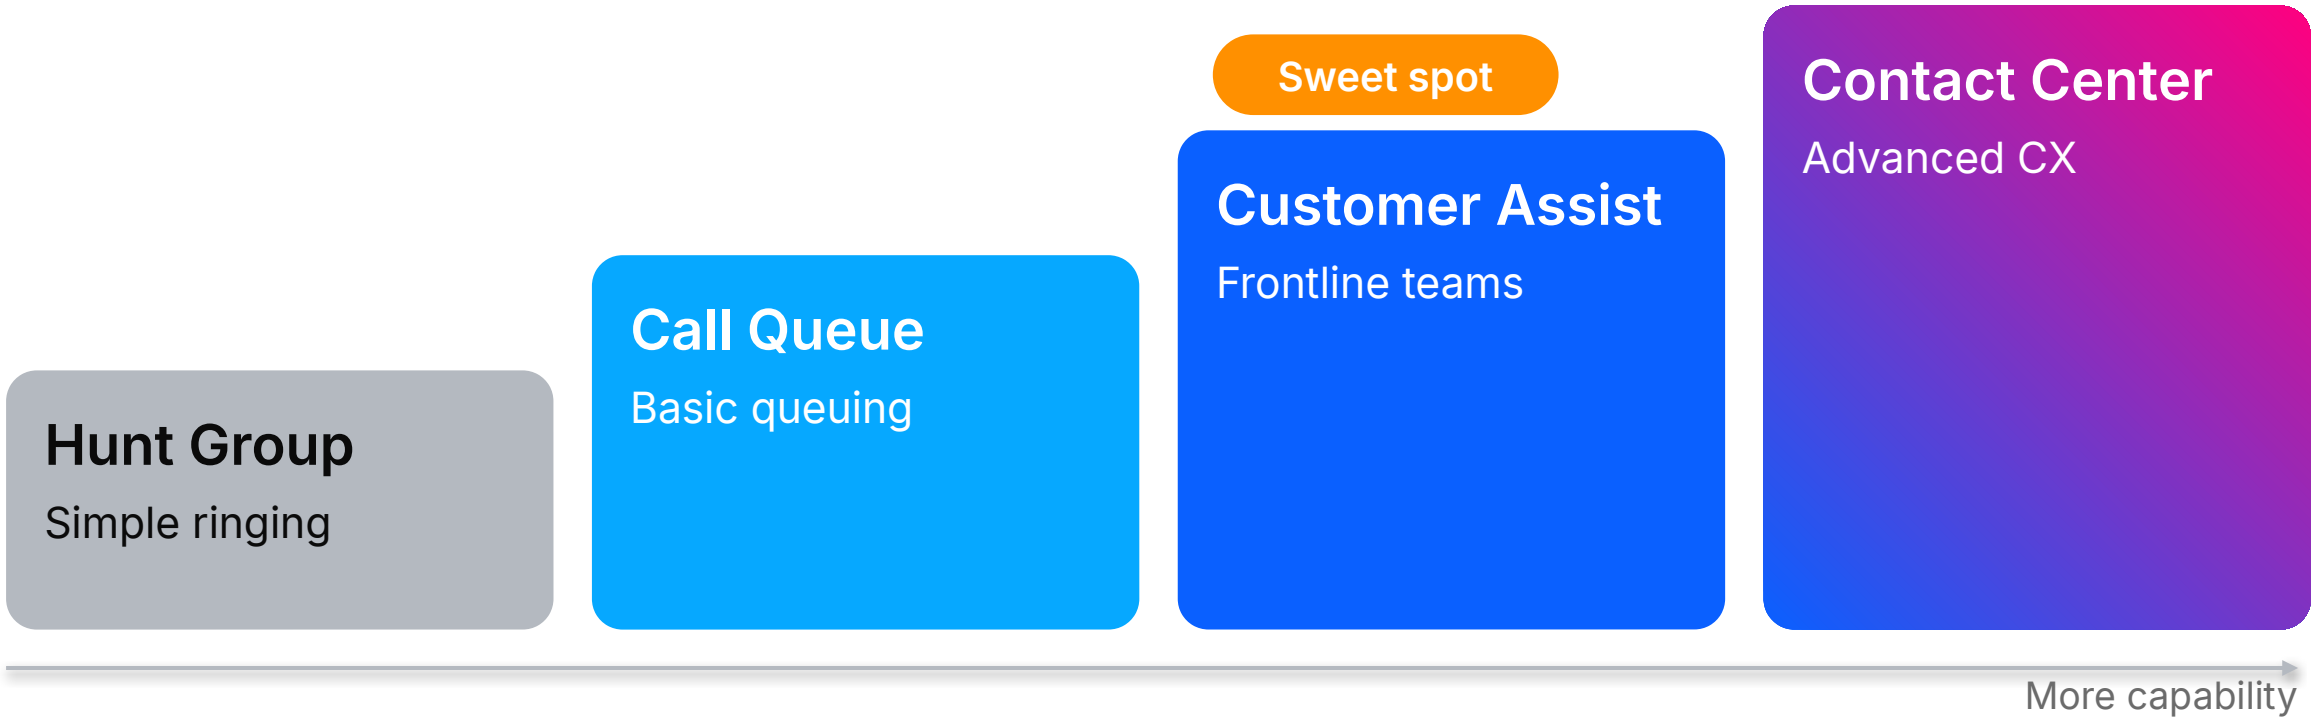

© 2026 Cisco and/or its affiliates. All rights reserved.

webex

PLAY 2 · CUCM HUNT PILOTS → WEBEX CUSTOMER ASSIST

Right-size every Hunt Pilot

TODAY: Hunt Pilot → Hunt List → Line Group → Members

© 2026 Cisco and/or its affiliates. All rights reserved.

webex

PLAY 2 · RATIONALIZE WITH GENAI

Clean first. Then move.

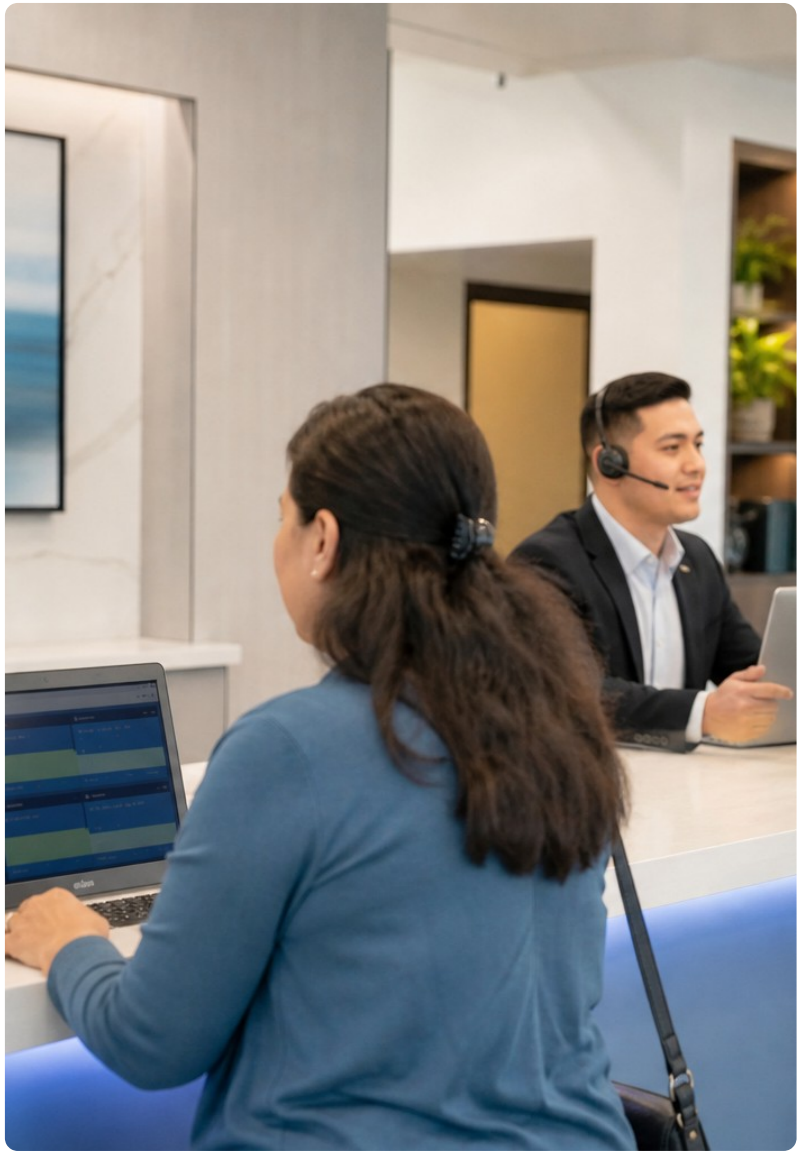

1 BAT extract → 2 Rebuild links → 3 Flag dead → 4 Classify → 5 Ask owners

CLASSIFY EVERY PILOT

Preserve | Simplify | Modernize | Retire | Need info

The AI payoff

Call summaries · Sentiment scoring
Supervisor dashboards in Webex App

© 2026 Cisco and/or its affiliates. All rights reserved.

PLAY 3 · UNITY CONNECTION → WEBEX CALLING

Unity handlers → AI Receptionist

PREREQUISITES

32-bit Informix ODBC driver

Remote Database Proxy enabled

HEADS UP

Greetings (.wav) don't migrate.

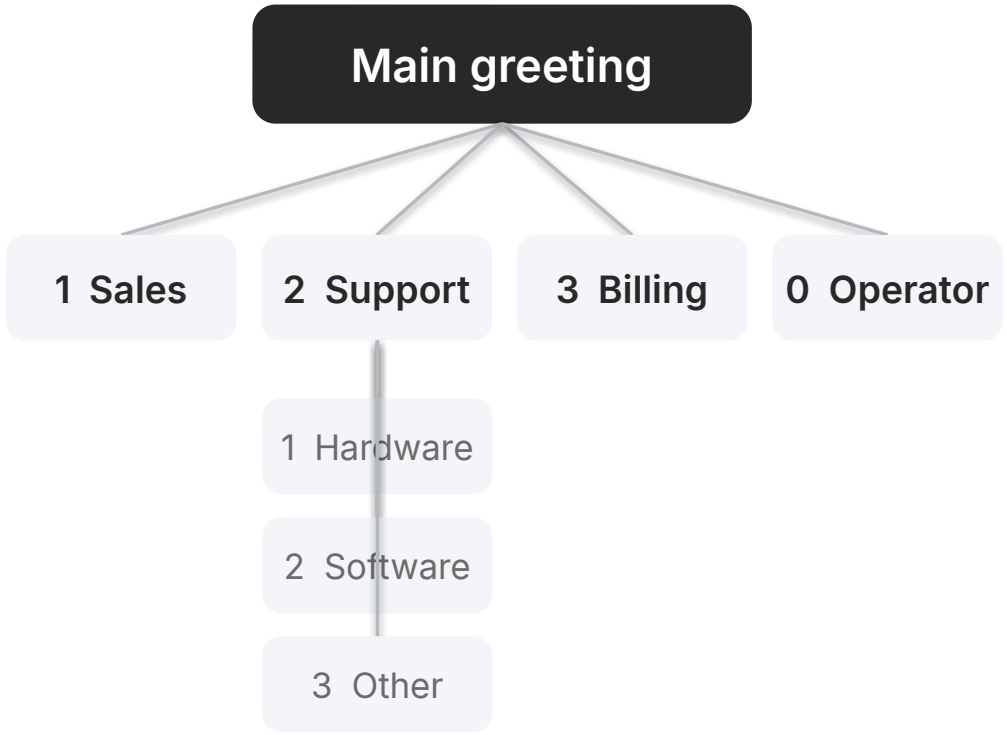

Re-upload them manually.

© 2026 Cisco and/or its affiliates. All rights reserved.

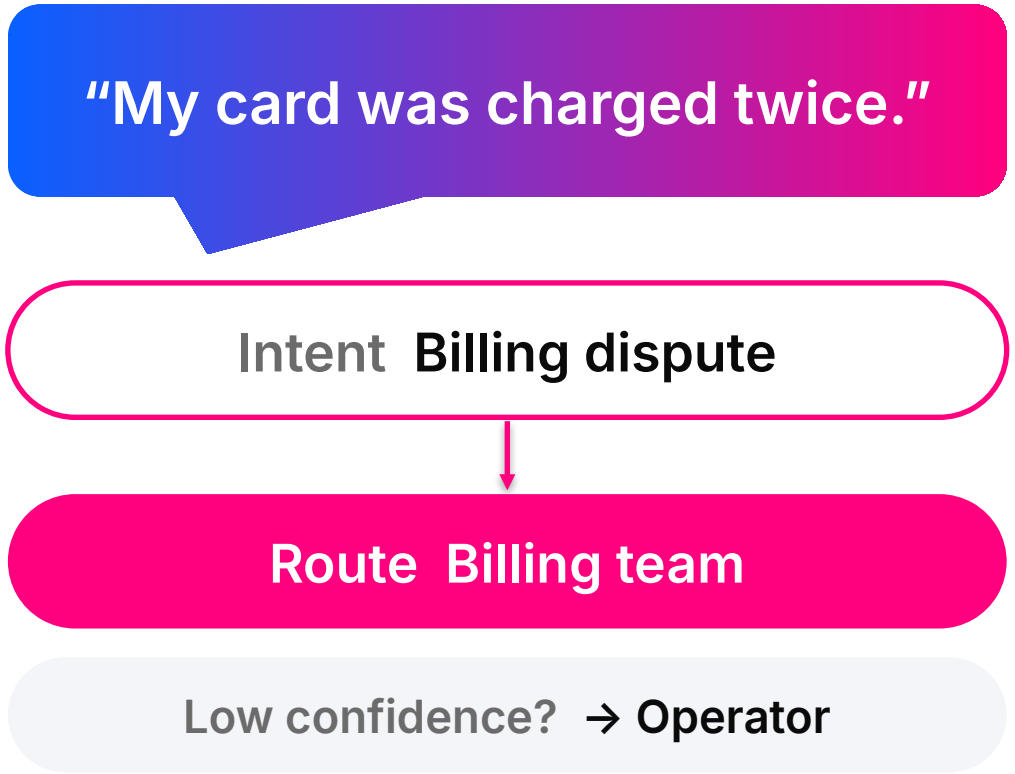

webex

PLAY 3 · REDESIGN THE EXPERIENCE

From key presses to intents

Rigid. Deep. Touch-tone.

Natural. Flat. Intent-driven.

© 2026 Cisco and/or its affiliates. All rights reserved.

PLAY 3 · WEBEX AI RECEPTIONIST

24/7 AI Receptionist

- No-code in Control Hub
- Answers FAQs from your knowledge
- Routes by intent + business hours
- Multilingual personas

© 2026 Cisco and/or its affiliates. All rights reserved.

PLAY 4 · CUCM DIAL PLAN → WEBEX CALLING

Trace the dial plan before you move it

NUMBERING

- Directory numbers
- Shared lines

→

POLICY

- Partitions
- Calling search spaces
- Calling privileges

→

ROUTING

- Route patterns
- Translation patterns
- Route lists / groups

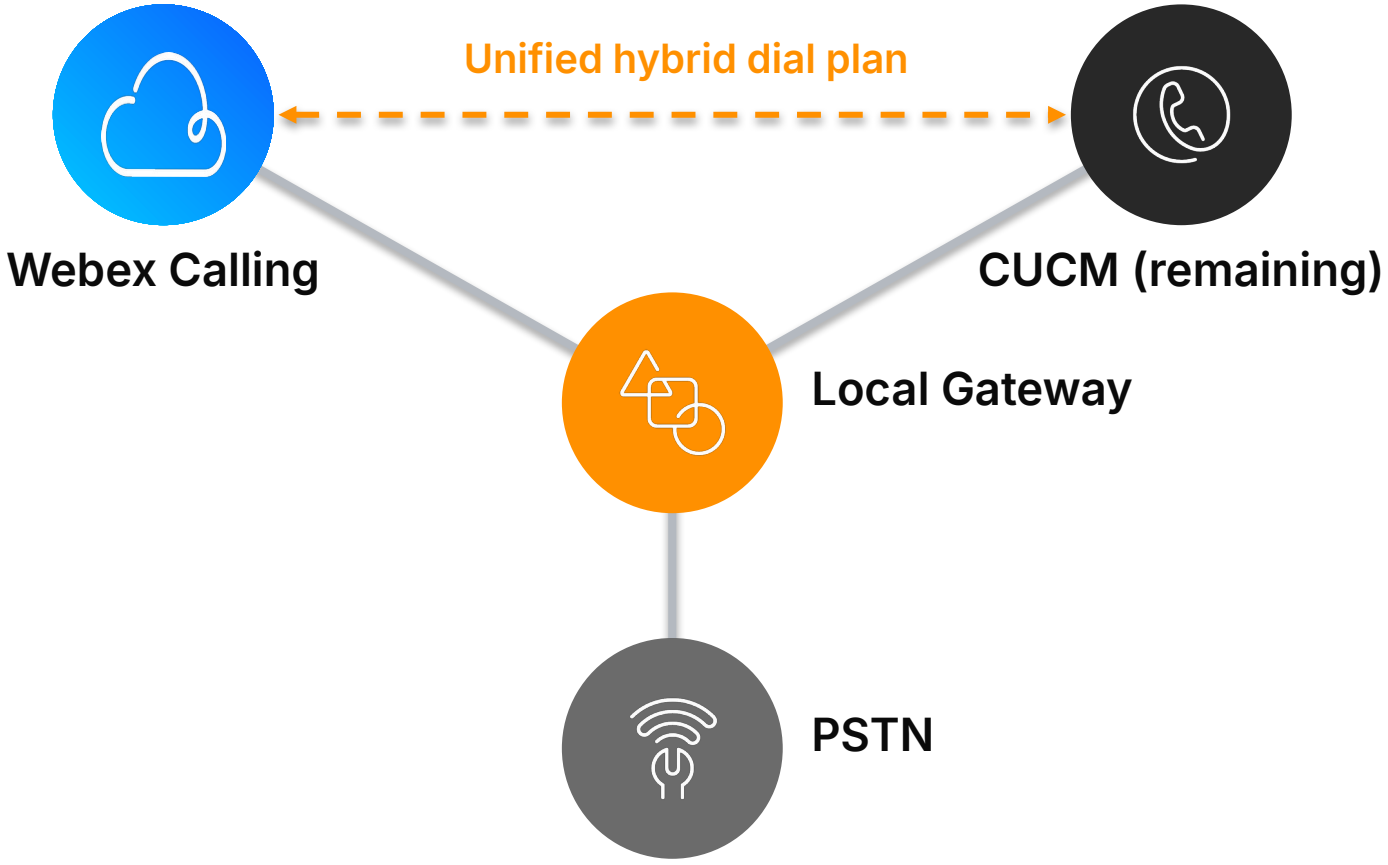

GENAI DOES THE TRACING

- Find duplicates
- Explain conflicts
- Normalize to E.164
- Generate test plans

© 2026 Cisco and/or its affiliates. All rights reserved.

PLAY 4 · HYBRID SAFEGUARDS

Hybrid routing = zero-downtime cutover

CUTOVER CHECKS

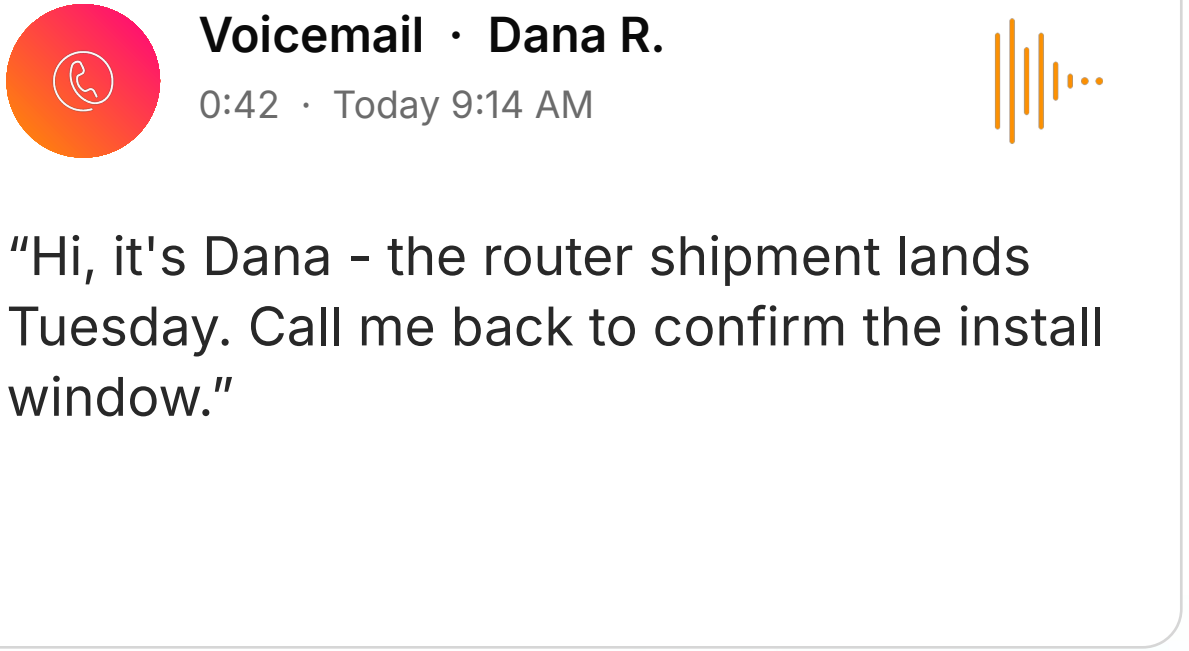

- Extension reachability
- PSTN in / out
- Emergency calling
- Voicemail routing
- Shared-line behavior
- Calling permissions
- Caller ID
- Failover / rollback

© 2026 Cisco and/or its affiliates. All rights reserved.

webex

PLAY 4 · VOICEMAIL AI TRANSCRIPTION

Every voicemail, readable

6 languages, natively

EN FR DE IT JA ES

Toggle per Location in Control Hub

Delivered to Webex App + email

© 2026 Cisco and/or its affiliates. All rights reserved.

webex

PLAY 4 · SHARED LINES

Shared lines are workflow signals

WHAT YOU SEE IN CUCM	LIKELY WEBEX PATTERN
Executive / assistant coverage	Executive Assistant
Informal queuing	Call Queue or Customer Assist
Multi-device mobility	Multiple devices per user
Departmental ownership	Hunt Group or virtual line
Legacy workaround	Retire

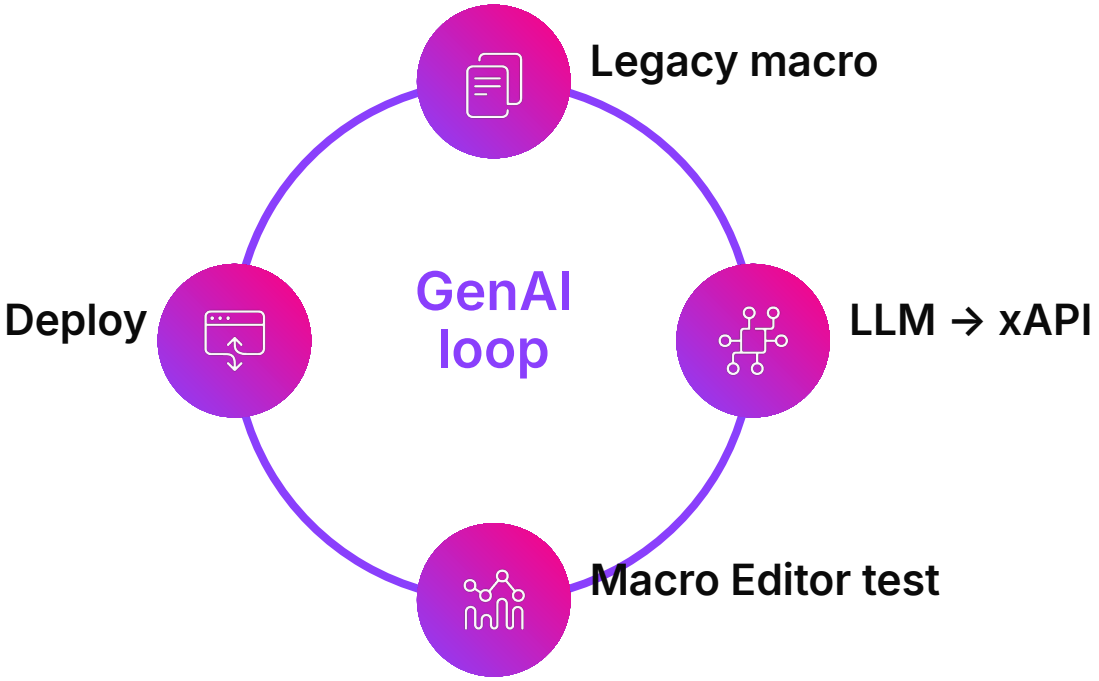

Ask why the line is shared - then pick the pattern.

© 2026 Cisco and/or its affiliates. All rights reserved.

PLAY 5 · CE ENDPOINTS → ROOMOS

Keep the macros. Then modernize them.

CE endpoint → Webex Device Connector → Control Hub Workspace

HEADS UP

CE 9.x ↔ RoomOS xAPI isn't always 1:1

Test HVAC & AV integrations first

PRESERVED

UI Extensions · Macros · Central management

© 2026 Cisco and/or its affiliates. All rights reserved.

webex

PLAY 5 · ROOMOS

Every room, AI-ready

Webex AI Assistant

Real-time captions

One pane: Control Hub

© 2026 Cisco and/or its affiliates. All rights reserved.

PLAY 5 · DEVICE DECISIONS

Triage every endpoint

Supported device **Migrate**	Legacy macro **Refactor + test**	Unsupported endpoint **Replace / retain**	Unused UI Extension **Remove**
Hard-coded integration **Redesign**	Duplicate naming **Normalize**	Low utilization **Re-evaluate**	Complex control **Validate**

© 2026 Cisco and/or its affiliates. All rights reserved.

03
Trust & Guardrails

AI OUTPUT LEVELS

Earn your way to automation

Start advisory. Prove reliability before you automate.

1 Advisory

Summaries · diagrams · questions

2 Draft artifacts

CSV · JSON · code · test plans

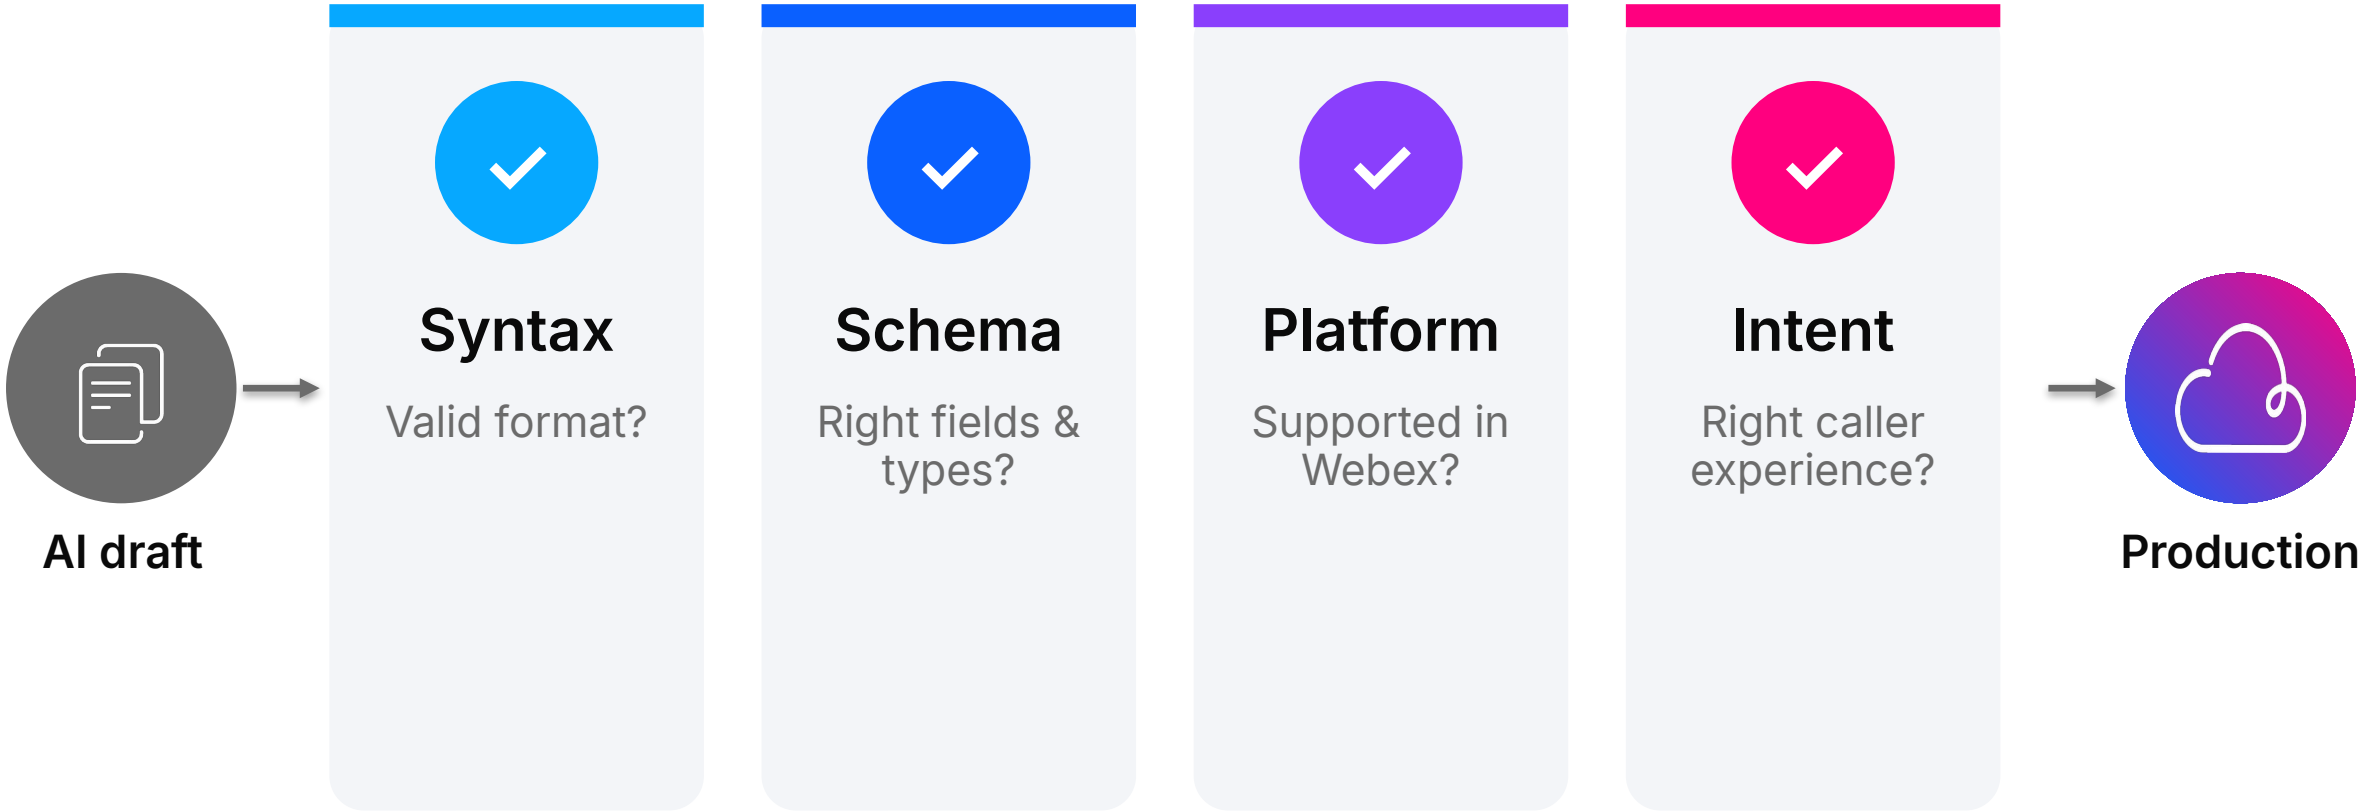

3 Controlled automation

APIs · schema checks · pipelines

© 2026 Cisco and/or its affiliates. All rights reserved.

VALIDATE EVERY AI OUTPUT

Four gates to production

© 2026 Cisco and/or its affiliates. All rights reserved.

RISK → FIX

Know the failure modes

Hallucinated API → Supply the docs	Outdated terms → Date the prompt	Wrong mapping → Force classification	Lost leading “+” → Numbers as strings
Edited CSV headers → Lock the headers	Missing relationships → Give a data dictionary	PII in prompts → Sanitize first	Overconfidence → Require labels

© 2026 Cisco and/or its affiliates. All rights reserved.

MODEL SELECTION

Pick your model like a vendor

Data protection

Where does data go?

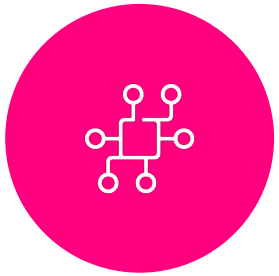

Context window

Fits the whole export?

Structured output

Reliable JSON / CSV?

Reasoning & code

Handles routing logic?

Audit & retention

Meets governance?

Rule of thumb: enterprise tenant or it doesn't touch config

© 2026 Cisco and/or its affiliates. All rights reserved.

MIGRATION OUTPUTS

Ship an evidence pack, not just a config

DISCOVER

- Inventory
- Sanitization record
- Behavior summary
- Dependency map

DESIGN

- Assumptions
- Target mapping
- Exception list
- Draft artifacts

DELIVER

- Validation results
- Rollback plan
- Approval
- Documentation

© 2026 Cisco and/or its affiliates. All rights reserved.

RECAP

Five plays. One pattern.

PLAY	EXTRACT	ANALYZE	LAND ON	AI WIN
UCCX	AEF scripts	Caller paths	Contact Center	AI Agent
Hunt Pilots	BAT export	Queue behavior	Customer Assist	Summaries
Unity	DataDump CSV	Menu tree	Auto Attendant	AI Receptionist
Dial Plan	BAT export	Conflicts	Webex Calling	VM transcription
Devices	Inventory	Readiness	RoomOS	AI Assistant

© 2026 Cisco and/or its affiliates. All rights reserved.

KEY TAKEAWAYS

Five things to do Monday

01

Recover intent

before mapping

02

Sanitize data

before AI

03

Expose

assumptions

04

Validate

against schemas

05

Transform,

don't just migrate

© 2026 Cisco and/or its affiliates. All rights reserved.

Your legacy config is data. GenAI turns it into a roadmap.

Extract → Sanitize → Analyze → Transform → Validate

© 2026 Cisco and/or its affiliates. All rights reserved.
